

Herd Register for Bovine Animals

Name

Address

Postcode

Holding number

Herd Mark

Notes for Guidance

Unless you can produce an accurate up-to-date herd register for inspection by authorised officials on request you may lose premium and/or face prosecution. If you already keep records which you are satisfied comply with the legal requirements there is no need to keep this register in addition to your other records. A computer register is acceptable so long as it produces a register similar to this format. Please keep your register in a safe place.

If you decide to use this booklet, you should enter details of all the cattle on your holding in the Individual Animal Record and complete the first entry in the Continuous Herd Record.

Entries should be clearly printed in ink and the register must be retained for at least 10 years from the end of the calendar year in which the last entry was made. Entries should be completed by the following deadlines:

- 36 hours in the case of movements on or off a holding;
- 7 days for the birth of a dairy animal;
- 30 days for the birth of cattle not in a dairy herd;
- 7 days for death;
- 36 hours of replacing eartags.

Individual Animal/Movement record

All additions to your herd, all movements on and off your BCMS registered holding, and all deaths on farm, must be recorded. Details of **all** cattle, not just those for which a subsidy has been claimed, must be recorded. Movements of the same animal on and off the holding, including temporary movements which need to be notified to BCMS, must appear on the same line. A new entry must be started when/if an animal returns to the holding. You may find it easier to record male and female animals on separate pages or in different parts of the book.

Columns 1-4 must be completed:

- column 1: the old and new ear tag numbers of retagged animals (RT) should be included;
- column 2: the exact date of birth must be entered. If not known, enter the best estimate of month and year;
- column 3: the list of codes on the next page must be used.;
- column 4: use F for females and M for males including steers;
- column 5: the ear tag number of the dam, and where relevant, the surrogate dam, must be entered for calves born on your holding. The sire's ear tag number is optional but you may find it useful;
- columns 6 and 7 must be completed for all cattle brought onto your holding;
- columns 8 and 9 must be completed for all cattle which leave your holding e.g. to another holding, to a knackers yard etc., or which die on farm. In the latter case you should also show the method of disposal, and if relevant, the date of movement of the carcass, the name of the haulier, and the destination to which the carcass was sent;
- column 10 is for any notes of your own. For example you may find it useful to note animals for which premium has been claimed in a particular year, or to add management tag cross references. If you are likely to claim extensification premium you may wish to note when animals become 6 and 24 months old.

Continuous Herd Record : running totals

It will help to demonstrate your eligibility for **beef** premiums if you complete the first three columns, although it is not a legal requirement. Every time the total changes (e.g. due to births, deaths, purchases or sales) you should fill in a new line on the Continuous Herd Record. If you complete the other columns it will make it easier to determine the number of cattle eligible for premium payments particularly extensification payment and reduce the time taken at inspections. Note that changes may occur in columns (d) – (k) which may not result in changes in the totals at columns (a) and (b).

Breed codes to be used in column 3 of Individual Animal/Movement Records

The breed codes may be revised as necessary. For breeds not covered enter in full.

For crossbreeds record the dominant breed followed by X

Breed code		Breed code		Breed code
